1 INTRODUCTION

Communication plays a critical role within Kenya Airports Authority. As a government agency Kenya Airports Authority must comply with relevant legislation, regulations and standards concerning aviation and financial reporting.

Kenya Airports Authority Communication Policy is an important aspect of our continual efforts to build up global trust in the corporate brand. It has been adopted by Kenya Airports Authority Board of Directors to provide guidelines for how communication should be conducted to ensure that it is in accordance with the organizations interests. In today’s global information society, however, requirements and standards are constantly changing, and accordingly, Kenya Airports Authority Communication Policy will be scrutinized and revised on an ongoing basis.

The Communication Policy provides guidelines for how Kenya Airports Authority’s managers should act in their daily communications with employees and external stakeholders. The policy primarily covers objectives, division of responsibilities and general guidelines for communicating with various target groups. It also provides guidelines with regard to who can act as a spokesperson for the organization and addresses the rights of employees to state their opinions. Detailed guidelines for communications are provided in the appendices.

2 GOALS

The main purpose of Kenya Airports Authority Communication Policy is to establish guidelines for presenting the organization to current and potential stakeholders, both internally and externally. Furthermore, the policy is aimed at increasing the level of understanding among all employees as to how Kenya Airports Authority communicates with its stakeholders.

2.1 Main goals for external communications:

- Support the business concept and strategies
- Strengthen confidence in the Kenya Airports Authority brand and its sub brands, its employees, management, and services
- Share information with regard to developments within the organization
• Meet expectations concerning Kenya Airports Authority’s compliance with legislation, regulations and standards relating to communication activities
• Support a correct evaluation of the Kenya Airports Authority brand and facilitate the raising of capital by giving as accurate a picture as possible of the organizations financial position
• Manage the image of Kenya Airports Authority, its services, and activities
• Facilitate recruitment of employees

2.2 Main goals for internal communications:

Make sure that the organizations goals, policies and guidelines are communicated

• Strive to give employees the information they need, when they need it, in order to increase understanding and commitment, build motivation, and support the organizations strategies
• Communicate with employees about decisions and events that affect them before (if possible) and never later than when information is communicated externally
• Contribute to Kenya Airports Authority’s business objectives
• Increase each employee’s knowledge about Kenya Airports Authority and its development
• Enhance employee’s knowledge of Kenya Airports Authority’s business objectives, strategies and values
• Provide clear and current information to employees on the organizations policies and information vital to the organization with regard to corporate branding (Corporate Identity)
• Internally disseminate success stories and good business solutions throughout the organization, in order to spread creativity and encourage inter-departmental synergy

3 DIVISIONS OF RESPONSIBILITIES

3.1 Responsibilities for external communication
The Managing Director is ultimately responsible for ensuring that Kenya Airports Authority’s communications are in compliance with the Communication Policy. The Managing Director (MD) has delegated strategic
responsibility for communication matters to the Manager Corporate Communication who reports to the MD. Communication with regard to litigation, contracts and compensation are the responsibility of the Chief Legal Officer.

3.1.1 Spokespersons

In order for Kenya Airports Authority’s communications to live up to the organizations policies and goals, it is essential that the organizations spokespersons are those individuals with the best expertise and overview. Only designated spokespersons are permitted to issue statements on behalf of Kenya Airports Authority. These persons must have access to relevant information about the organizations position and performance and about their particular areas of expertise. They must also be fully familiar with the ICAO and IATA rules and standards concerning circulation of aviation information. Kenya Airports Authority will react to information leaks and rumors only if these could seriously damage the organization. Otherwise, the standard reply is: “We do not comment on rumors.”

The Chairman of the Board may issue statements on pertinent issues arising from the Board’s responsibility as government representatives, strategies, nominations, appointments, compensation, and corporate governance of the organization. Other Board members are not permitted to make statements without prior consultation and with the approval from the Board Chairman.

The MD is the principal spokesperson for Kenya Airports Authority on organization-wide matters, including but not limited to the organizations financial position, business strategies, market assessments and future developments.

After the MD, the Manager Corporate Affairs and Communications serves as the organizations main spokesperson to the media and the general public and selects suitable individuals to respond to specific questions from the media and the public.

Other employees are not permitted to make statements on behalf of the Authority.

3.2 Responsibilities for internal communication
3.2.1 Corporate responsibilities
Corporate Affairs and Communication has operational responsibility for internal communications. All relevant and current corporate information is disseminated via email, such as policies, internal news, aviation related news, organizational changes, vacancies, articles, financial information, links to important business tools, etc. The importance of this communication channel is such, that it should be considered as the main source of corporate information to Kenya Airports Authority’s employees. Corporate Affairs and Communication has the responsibility to develop internal communications structures that ensure that the organization reaches all employees as quickly as possible via the most efficient communications channels. The organizations corporate language is English. Consequently, internal communication should be produced in English.

The Marketing and Business Development Department is responsible for developing and maintaining, the guidelines for Kenya Airports Authority’s Corporate Image and Identity within all our brands. All heads of department and Airport Managers (HOD’s and AM’s) are responsible for ensuring that the areas for which they are responsible follow these guidelines, and for consulting with the Marketing and Business Development department in this regard.

3.2.2 Departments and Airports responsibilities
The departments and airport administration are responsible for:
Ensuring access for employees to the corporate information published through email, within the respective sections that fall under them. Working with Corporate Affairs and Communications to facilitate internal communication flows and to communicate in line with the overall organizational strategies.

Ensuring that information material produced locally – such as newsletters, other publications and websites – conforms to Kenya Airports Authority’s guidelines as well as to legislation, regulations and standards. Internal information published under the responsibility of the Airport manager intended for corporate distribution must be coordinated with Corporate Affairs and Communications see above 3.2.1

3.2.3 Employee responsibilities
Employees within Kenya Airports Authority’s have an important responsibility to communicate in a professional manner.

4 RESTRICTIONS AND CONFIDENTIALITY
EMPLOYEES SHOULD NOTE THAT THEY HAVE A COMMUNICATION RESPONSIBILITY – TO TAKE IN INFORMATION THAT IS COMMUNICATED, TO SHARE INFORMATION AS APPROPRIATE, AND TO UPHOLD ORGANIZATION CONFIDENTIALITY AS PER THE KAA CODE OF CONDUCT

Internal and external communications are subject to various restrictions resulting from legislation, regulations, standards and agreements relating to customers and terms of employment as well as business considerations.

The Kenya Airports Authority’s corporate culture is characterized by open and trusting communication at all levels of the organization and between all groups of employees. This helps employees to become more involved in and committed to the organization’s development. However, employees are bound by professional confidentiality with regard to all information that is for internal use, relates to customers and their competition, Kenya Airports Authority’s competitors, or could potentially influence a procurement process. In the event of uncertainty regarding confidentiality issues, employees must contact their immediate superior, Corporate Affairs and Communication, or the Corporate Legal department.

In conjunction with customer negotiations about future projects or partnerships, union negotiations, employee remuneration and internal operations, or other transactions that could potentially affect the corporate image, only those who absolutely need to be involved in the matter should be informed. Special rules apply for such situations.

Intimate details of staff movement should never be disclosed to external parties. When an external party asks to speak to an employee at Kenya Airports Authority’s who is not available, the details to a person’s destination or business should never be disclosed. The correct response should be
- They are out of office
- On leave
- In a meeting, or
- Away on official duties

5 COORDINATION
In order for the Managing Director as well as the Manager Corporate Affairs and Communications to be able to act with authority as spokespersons for external and internal communications, it is essential that these individuals are kept informed about pertinent activities in all parts of the organization, and about questions originating from external stakeholders. This procedure helps to ensure high-quality communication and identifies where in the organization the ultimate responsibility for information lies.

Senior management and other managers are informed about the Authority’s and industry news and about articles and features in external media through reports from Corporate Affairs and Communication. Coordination is primarily the responsibility of the head of Corporate Affairs and Communications and which also entails responsibility for establishing and maintaining continual, organized contacts and information flows throughout the entire organization.

6 POLICY UPDATES
The Manager Corporate Communications is responsible, in consultation with other members of Senior management, for ensuring that Kenya Airports Authority’s Communications Policy is developed, updated, distributed and complied with.

7 CRISIS COMMUNICATION
A crisis is a situation in which events beyond Kenya Airports Authority’s control threaten to damage the Kenya Airports Authority’s relations with its shareholders, customers and employees, or its reputation, financial position or other vital interests.

A Crisis Management Team has been identified to handle crises, and all airports and departments briefed and trained on the procedures. Corporate Affairs and Communications is responsible for managing all internal and external communication during a crisis situation that could adversely affect the organization. For further details, see the Kenya Airports Authority’s Emergency Manual.

8 DISTRIBUTIONS, CONFIRMATION AND IMPLEMENTATION OF THIS DOCUMENT

APPENDIX 1 INTERNAL COMMUNICATION
Purpose
The purpose of Kenya Airports Authority’s internal communication is to contribute to the organization’s business objectives. It shall provide open and explanatory information aimed at informing employees of Kenya Airports Authority’s development, enhancing their knowledge of values, business objectives and strategies in order to strengthen their commitment, motivation, loyalty and sense of responsibility. Another important aim is to facilitate the recruitment of new employees by enabling Kenya Airports Authority’s employees to act as effective “ambassadors” for the Organization.

**Target groups**
All employees, including senior managers and airport managers

**Principles**
Internal communication at Kenya Airports Authority’s shall contribute to the organization’s business objectives. To this end, internal communication shall:
- maintain a high quality
- maintain continuity
- utilize benchmarking – in other words, point to successful methods that can provide inspiration and examples of excellence in the organization’s various operations.

Encourage two-way dialogue at all levels and develop possibilities for employees to give feedback and to be part of an open, inclusive communications climate.

**Responsibility**
The Heads of departments and Airport Managers (HOD’s or AM’s), bear the primary responsibility for creating an open communication culture that conforms to Kenya Airports Authority’s core values and Code of Conduct and has the necessary organization and resources for distributing relevant information to employees. Corporate Affairs and Communication is responsible for coordinating internal information.

**Channels**
In addition to daily contact between managers and employees, the main channels for distributing internal information are:
The main and foremost information channel is outlook, containing current and continuously updated company information, external and internal news, articles and policies, among other items.
Intranet is constantly updated with company information, external and internal news about KAA and aviation activities, articles and policies, among other items.

In person communication, such as group meetings, which are a very efficient communications channel, are encouraged. Departments, Airports, airstrips and sections are expected to have at a minimum monthly meeting as a medium for disseminating information and accessing performance.

Newsletters, periodical magazines, corporate handbooks, fliers information brochures and other IEC materials to ensure cascading of information concerning Kenya Airports Authority’s decisions, performance and events.

The corporate website also contains important information with regard to the news, policies, management structure, corporate social responsibility and operations of the organization.

APPENDIX 2 EXTERNAL COMMUNICATION
As an over-riding principle, no employees in the organization should communicate externally about KAA’s prospects, performance and policies, or disclose unpublished revenue sensitive information. As a further overriding principle, all disclosure in reports and documents that KAA publicly releases and/or files or submits to appropriate authorities must be full, fair, accurate, timely and understandable. The Chairman of the Board, the Managing Director & the Manager Corporate Communications are the custodians of eternal communication.

1. Investor Relations
Purpose
To keep the local and international public continuously informed about Kenya Airports Authority’s position, operations and development. The information provided by Kenya Airports Authority’s Marketing and Business Development department also serves to broaden knowledge of and interest in the organization and thereby enhance investment interest, reduce risk from information deficits, and facilitate the development of public private partnerships.
Target groups
Target groups are current and potential investors, financiers, airport operators and business journalists.
Principles
The information disclosed by Kenya Airports Authority’s concerning its financial position and development shall meet the following principles:

**Reliability** - All information shall be factual and correct, and must not be misleading in any way

**Speed** - All information shall be issued as quickly as possible, so that Kenya Airports Authority’s always retains the initiative to issue first-hand news

**Simultaneity** - All information to interested investors shall be conveyed to all target groups simultaneously

**Long-term, consistent and proactive** - Kenya Airports Authority’s shall always give correct and pertinent information to the public in order, as far as possible, to avoid surprises that could reduce trust in Kenya Airports Authority’s and have a negative impact on the Authority’s public relations. Information must be fact-based and not speculative. Accordingly, Kenya Airports Authority’s shall not comment on rumors and speculation, unless there are serious negative effects of not commenting

**Communication with the Stakeholder Community**

The Marketing and Business development department is responsible for KAA’s dissemination of information to Airport Stakeholders. Other than the, CEO, no other KAA personnel may speak to the Stakeholder community on behalf of KAA without prior approval by the Managing Director

Kenya Airports Authority’s encourages group meetings and one-to-one meetings with both local and international investors, and uses international forums to enhance such engagements. Kenya Airports Authority’s will hold stakeholders sessions on a continuous basis to create a better understanding of Kenya Airports Authority and assist these airport stakeholders in making an accurate analysis of the organization and its operations.

**2. Media relations**

**Purpose**

As the distributors of and commentators on of all general information issued by Kenya Airports Authority’s, the media constitute the single most important external target group. Since the media are among the most important sources of information about the Authority for airport stakeholders, employees and the rest of the world, it is essential that information provided to the media by Kenya Airports Authority creates awareness about the organization and its operations in
such a manner that the media convey an objective, pertinent and accurate picture of Kenya Airports Authority.

**Target groups**
Journalists in the press, radio, television and online media.

**Principles**
Representatives of Kenya Airports Authority’s must be familiar with and respect the media’s working conditions and integrity. Kenya Airports Authority’s media relations shall be characterized by openness, objectivity, speed, clarity, a long-term approach, continuity and high ethical standards. To be of value to the organization, relations with the media must be long-term and based on mutual relationships. Due to competition and the thirst for news within the media, articles and radio and television features are sometimes based on rumors and incomplete information. Consequently, all contacts with the media must respect the restrictions that apply to employees of Kenya Airports Authority. The basic rule is that all important information must be released simultaneously and with equivalent content to all media houses.

**Communication with the Media**
It is the authority’s policy to manage its relations with the media in an open and pragmatic way. The authority will be responsive to the legitimate interests of the media. It will also be proactive in disseminating information about the authority, its policies and services when it is judged to be in the best interests of the business by the management.

**Media Calls**
All requests from the media should be recorded accurately and passed on immediately to Corporate Communications or Airport Manager. This includes formal requests for interviews as well as enquiries, and includes all media – TV/Radio, newspapers, magazines, local/national and international media and internet sites. Communications Manager respond on KAA’s behalf.

**Spokespersons – Chairman, Managing Director or Corporate Communications Manager**
Spokespersons – Designated Employees
Corporate communications staff may designate individuals other than those with communications responsibilities to serve as company spokespersons on an *ad hoc* basis. No employee should talk with the media without the approval and advice of Managing Directors office. The Communications office will provide the necessary preparation and materials as well as attend the subsequent interviews. Designated spokespersons may only speak on behalf of the company on issues directly related to their specific area of expertise, and may not address reporter inquiries related to other topics or issues, as even the release of accurate information, provided at the wrong time, could put the authority’s reputation at risk.

Personal Representation in the Media
It is recognized that from time-to-time, employees may be approached by the media on topics related to their personal interests or non-work related activities. Employees may participate in such interviews. However, in order to avoid any confusion about whether an employee is speaking on their own behalf or on behalf of KAA, employees may not reference KAA or their role with the company, unless they have obtained prior approval to do so from MD’s office.

3. Internet Communications & social media
Employees are forbidden from making any public posting of confidential or proprietary information related to any aspect of KAA’s business on the Internet. Employees should not reveal information about the company and its activities in any internet-based forum including (but not restricted to) chat rooms, bulletin boards, blogs, twitter wikis, etc. Business-related internet-based tools may be operated by KAA and controlled by corporate communications office.

“Be prudent and use common sense.” Remember everything you contribute online stays forever and that everything you do, often on a personal basis, reflects on Kenya Airports Authority as an organization. Any communication that is deemed to be inappropriate or/and Illegal will be handled as per the Human Resource Manual.

Responsibility
The head of Corporate Affairs and Communication has overall responsibility for all media contacts.
Channels
The Corporate website, Social Media, Annual Report, Interim Reports, Press Releases, Presentation Materials, Conference calls, and individual contacts with journalists.

3. Guidelines for sponsorship activities
Proposals concerning Kenya Airports Authority nation-wide sponsorship activities must be approved as per the by the Corporate Social Responsibility Policy. Proposals shall be evaluated based on legality, image building potential and social responsibility value to the public’s living around our airports.

4. Community Relations
To increase people’s knowledge about Kenya Airports Authority and its operations, focusing on the organization’s role as a responsible aviation company in the local communities where our airports are located, with the aim of strengthening people’s confidence in Kenya Airports Authority and its brands. Corporate Communications section is responsible for developing and implementing community outreach programs including social & community awareness incentives. These programs will promote the organization's image in a positive and community-oriented way.

APPENDIX 3 CORPORATE WEBSITE
There shall be only one Kenya Airports Authority website: https://kaa.go.ke. as a principal source of information about the organization, the website plays a strategic role in the Authority’s communication program. The Kenya Airports Authority website should be a high-quality central medium serving both internal and external visitors.

It is Kenya Airports Authority’s aim that all important information should be published on the website with the minimum possible delay. The Corporate website shall be systematic in its structure, easy to navigate in and set up in such a way that different stakeholder groups can easily find the information they are seeking.

2.9.3.1 In the event of an emergency, VIP3 shall be activated Corporate Communications Manager under direction of the Decision Making Team and be designated as the **Media Briefing Centre**.

2.9.3.2 On arrival at the airport, Media personnel shall be directed or escorted to the briefing room (if the airport has been cordoned off), where they shall be issued pre-prepared briefs about the emergency and any other necessary briefs and assistance they may require to facilitate their work of reporting.

2.9.4 **Access to the Accident Scene**

2.9.4.1 When allowed by the EOC to visit the scene, the media shall be identified via the Media House Badge, issued with a KAA Security Pass, and escorted by KAA Security and KAPU through the designated access point to the scene of the accident. The On Scene Commander shall brief the media at the site of recovery progress.

2.9.4.2 The On scene Commander shall assign a KAPU officer to control/co-ordinate media activities at the scene to avoid disrupting or interfering with rescue operations.

2.9.4.3 To obtain access rights, Media Vehicles must have the Media House's Logo displayed conspicuously on the vehicle and shall remain in the area identified until escorted back to the landside via a designated access point.

2.9.5 **Media Helicopter (aircraft) Operations/Drones operations**

2.9.5.1 Media helicopter operations shall be restricted onto the scene of accident, and shall only carry out such operations after having been authorised to do so by the National Disaster Operations Centre and the Decision Making Team.

2.9.5.2 When authorised to do so, any fly-over or landing near the scene of accident shall be directed by Duty ATCO in close coordination Ground Flight Safety and On-Scene Commander.

2.10 **AERODROME EMERGENCY EXERCISE**

2.10.1 **Objectives of Emergency Exercise / Drills**

2.10.1.1 The purpose of emergency exercises is to ensure the adequacy of the following:

(a) Response of all personnel involved

(b) Emergency plans and procedures

(c) Emergency equipment and communication
3.22 **ACTION BY DUTY IMMIGRATION OFFICER**

3.22.1 On receipt of aircraft accident call from the Duty Customer Services Officer, the Duty Immigration Officer shall activate the internal alerting process including information to all immigration staff on duty.

3.22.2 Obtain and verify accuracy of the copy of the crew list (General Declaration) and passenger manifest of the aircraft involved in the accident from the Aircraft Operator/Representative.

3.22.3 Deploy suitable numbers of immigration officers to Terminal I and/or accident site

3.22.4 Commence immigration clearance of all victims present at the designated clearance point (SRC).

3.22.5 Liaise with Police and Aircraft Operator/GHA representatives at EOC to facilitate Immigration clearance for hospitalized victims.

3.22.6 Use Immigration Records (if available) to provide to the Police and EOC additional personal details of those on board the accident flight.

3.22.7 Ensure a completed copy of the Passenger Record Card for each victim present is provided to Immigration staff present. In the absence of travel documents, these completed forms should be accepted in lieu – for the purpose of landing / re-entering the victims into Kenya.

3.22.8 Consult with the Incident Commander for any assistance.

3.22.9 Open and maintain a written log of events associated with the accident.

3.23 **ACTION BY MANAGER CORPORATE AFFAIRS - KAA**

3.23.1 On receipt of information about aircraft accident from the PABX, Airport Manager, Manager Operations or any other source, the Manager Corporate Affairs shall obtain a clear brief about:

a) Location of accident.
b) Type of aircraft involved (Passenger or Cargo).
c) Origin/destination.
d) Souls on Board (if available).
e) Response agencies on ground or on the way.
f) Any other necessary information.

3.23.2 Alert the Managing Director and KAA senior Management Team at head office.
3.23.3 Liaise with the Airport Manager and other relevant agencies for detailed briefs to facilitate preparation and release (when directed so by the Decision Making Team – EOC or Managing Director KAA) of the initial Press/Media Statement about the accident.

3.23.4 Report to the EOC, Communication Room, establish contact with the Decision Making Team (DMT)

3.23.5 Implement Media Briefing plan by preparing, managing and disseminating (once approved by the Decision Making Team EOC) any information related to any emergency.

3.23.6 Jointly with aircraft operator or representative, formulate and implement a crisis information management plan and information flow strategies.

3.23.7 Set up, man and operate the Emergency Information Centre to deal with enquiries from the Media as per plan and strategy.

3.23.8 Advise the EOC and Overall Commander on requests from the Media to visit the accident location.

3.23.9 Brief those presenting or reading statements at press conferences on 'how to handle the Media' especially when responding to Media questions.

3.23.10 Ensure appropriate Web Sites are used to best advantage in support of the crisis in particular, as well as a method of providing information to the Public and the Media.

3.23.11 In conjunction with the aircraft operator/representative, offer to supply suitable Media response personnel in support of accident victims and their friends and relatives, in their dealings with the Media, when such support is requested.

3.23.12 Open and maintain a written log of events associate with the accident.

3.24 **ACTION BY COMMUNICATIONS TEAM**

3.24.1 The communication team shall be responsible for:
   a) Liaising with the Decision Making Team to issue communiqué
   b) Preparing briefs for dissemination to airport agencies and stakeholders
   c) Preparing Press/Media Releases and other Reports for the Decision Making Team’s approval and release to the Media houses.
   d) Organizing initial and schedule subsequent Press Conferences for the Decision Making Team.
e) Controlling and coordinating the operations and functioning of the Media Briefing Room.
f) Monitoring and securing press releases both print and electronic.
g) Media Centre will be VIP3.
h) In the event that the circumstances force evacuation of VIP3, an alternate Media Centre will be set up at another location.

3.25 DUTY OFFICER OPERATIONS COMMAND – DEPARTMENT OF DEFENCE (DOD)

3.25.1 On receipt of aircraft accident information from the PABX, Police HQs or any other source, the Duty Officer Ops Command DOD, shall upon reconfirmation immediately notify;
   a) Chief of Operations/Senior Duty Officer DOD.
   b) Duty Officer, Kenya Air Force Operations.
   c) Duty Officer, Embakasi Garrison.
   d) Duty Officer, 50 A.C.B. Embakasi Garrison.
   e) Duty Officer Armed Forces Memorial Hospital.
   f) Duty Officer, Kenya Army Operations Centre

3.25.2 Relay final decisions from DOD to the affected formations advising them to commit their resources to the emergency.

3.25.3 Deploy identified resources.

3.25.4 Commence and maintain a written log of events associated with the accident.

3.26 DUTY METEOROLOGICAL SERVICES OFFICER

3.26.1 When contacted by the Duty ATC, the Duty Meteorological Services Officer shall:-
   a) Notify the Officer in Charge, Metrological Services.
   b) Make special report of the weather prevailing at the time of the accident.
   c) Submit the weather report to EOC (Crisis Management Team).

3.27 DUTY BIRD SCOUTS (JKIA)

3.27.1 On observing an accident involving an aircraft or any incident within the airside likely to jeopardize aircraft operations in the airport, the Bird Scout officer shall immediately alert:
   a) Duty ATCO,
   b) Duty Fire Officer,
   c) Duty GFSO on the nature of accident using the VHF radios.
   d) Manager Wildlife and Birds for information.

1. INTRODUCTION

Corporate Social Responsibility (CSR) is the continuing commitment by business to behave ethically and contribute to economic development while improving the quality of life of the workforce and their families as well as of the local community and society at large. CSR is a global practice employed by corporate companies to integrate social, environmental and economic concerns into their values, culture, decision making, strategy and operations in a transparent and accountable manner and thereby establish better practices within the organisation to create wealth and empower the community.

The Kenya Airports Authority (KAA) is committed to collaborating with communities living within the areas of its operation to improve the quality of life through promotion of education, clean water supply, and provision of health facilities and enhancement of good environment.

Towards this, KAA will improve its reputation in the community and operational efficiency, while reducing its risk exposure and encouraging loyalty and innovation. This will position KAA as a good corporate citizen which is an integral part of good business management and as a company of choice by investors, employees, customers, regulators and strategic partners.

KAA will endeavour to create harmonious relations and partnerships with communities living within its areas of operation and other stakeholders for their mutual benefit.

The Authority will focus on the following areas for its CSR.

(i) Promotion and support of education
(ii) Protection and enhancement of good environment
(iii) Provision of clean water and boreholes for needy communities living within the operational areas
(iv) Conduct business in a responsible and ethical manner (observe health and safety and respect to diverse culture in areas of operation)
(v) Involve staff in CSR programmes and encourage them to volunteer themselves to serve the disadvantaged communities in the areas of operation.
2. POLICY OBJECTIVES

2.1 KAA Vision and Values

The Kenya Airports Authority operations are guided by a vision and a mission drawn to align it with the national focus of “The Kenya’s Vision 2030”. The KAA vision is “To be the Airport System Hub of Choice” while the mission is “To facilitate seamless connectivity through provision of efficient and effective Airport facilities and services in an environmentally sustainable manner to exceed stakeholder expectations”.

The Authority is committed to upholding the following Core Values as the guiding principles for its vision in the medium and long-term;

(i) Customer focus,
(ii) Integrity and professionalism,
(iii) Teamwork,
(iv) Creativity and innovation,
(v) Good corporate governance,
(vi) Environmental sustainability, and
(vii) Corporate social responsibility

It is appreciated that Kenya Airports Authority operates with a dynamic social and economic environment that greatly influences management decisions and actions on her day to day operations. In this regard, therefore, the Corporate Strategic Plan is dependent on how KAA enhances its internal capabilities, exploits the existing opportunities and manages her weaknesses, while controlling risks to the planned programmes and activities. Environmental management and corporate social responsibility activities are considered as among the functions that KAA should emphasize on to meet the local and international best practices for airports as desired in the vision and mission statements.

The management and reporting of CSR interventions and initiatives is becoming a yardstick for evaluating the overall performance and ability of an organisation. There is a large growing body of evidence linking organizations strong performance addressing social and environmental issues to strong performance in creating long term stakeholder values.
2.2 Overall objectives of CSR

(i) To develop and sustain mutual relationships with communities and collaborate in addressing issues which affect them

(ii) To demonstrate the Authority’s commitment to carry out business as a responsible corporate citizen

(iii) To enhance support for the Authority’s business activities

(iv) To cultivate more understanding of the Authority’s operations, achievements and policies

(v) To enhance the brand equity – visibility and promote a positive image

(vi) To bridge the gap between the Authority and its stakeholders

(vii) Integrate environmental management and conservation in the operation’s structures

2.3 Areas of priority focus

Most organisations tend to be everything to everyone – meaning, deploying all manner of resources to assuage the needs of all sectors without making real impact. The new CSR aligns the projects earmarked for support with the organisation’s core business and neighbouring communities. Any CSR support allocation to a community that is far removed from the primary environment of the organisation is perceived imprudent, while any project that calls on the organisation to acquire new resources or huge spends to realize, is often misplaced. This should be the guiding principle informing KAA’s Corporate Social Responsibility policy.

The Authority has offices spread across the country and due to the nature of its operations and to get maximum impact in the society, we will focus of four priority areas as our core CSR programme.

(i) Education

(ii) Environment

(iii) Water

(iv) Culture
2.4 Other Areas of Focus

The Kenya Airports Authority will consider and partner with communities in the following areas. However, sustainability of some of these projects and programmes will be critical for the Authority's support.

(i) Health
(ii) Sports
(iii) Art and Culture
(iv) Safety
(v) HIV/AIDS
(vi) Infrastructure
(vii) Local entrepreneurial development and business incubation

3. MANAGEMENT AND IMPLEMENTATION OF THE CSR PROGRAMMES

Kenya Airports Authority Board of Directors, management staff and stakeholders will be personally committed to the CSR agenda but equally, the CSR programme will be business-led, incorporating control measures and initiatives to the extent merited by business risks and opportunities. Senior management will make an authentic, firm and public commitment to CSR efforts, and engage with them. The CSR efforts will be born organically throughout lower levels of the Authority employees. To ensure maximum effectiveness of the programme, CSR activities will be carried out in three levels

3.1 CSR Management Committee

The CSR management committee will consist of members appointed by the KAA Managing Director and will be drawn from the Headquarters and the field stations. The team will meet at the corporate headquarters to handle policy matters, project approvals and budget allocation. The Committee will have the overall supervision of the CSR programme.

Key role of the CRS Management Committee

(i) To define and review the Authority’s management of CSR in line with the policy and business strategy.
(ii) To recommend and approve CSR programmes and activities
(iii) To monitor and evaluate the impact and suitability of programmes and activities
(iv) To guide area committee and ensure overall success of the CSR programmes.

3.2 CSR Area Operational Committees

The CSR Operational Area Committees will be based in work areas and stations e.g. the airports and airstrips. Key Roles of the CSR Area Operational Committees

(i) To identify and propose CSR activities in work areas
(ii) To coordinate implementation of the CSR programmes
(iii) To act as a liaison point for addressing local community/stakeholders issues
(iv) To report to the management committee on the progress of the programmes/activities
(v) Accounting and monitoring of the funds and resource utilization.

For the purposes of CSR programmes, the following will be considered as the key operational areas:

- Head Office: This committee will take care of overall CSR agenda, under the guidance of the Managing Director.
- Coast Region: The committee, to be stationed in Mombasa, will handle the agenda in respect of Moi International Airport, Malindi, Manda, Ukunda and other airstrips in the region.
- Central Region: The central committee, based in Nairobi, will take responsibility for JKIA, WAP, Nanyuki, Embu, Sagana and all airstrips in the region.
- Western Region: The committee will be based in Kisumu and will oversee the agenda for EIA, Kakamega, Busia, Kitale, Kisumu and all airstrips based in the region.

3.3 CSR Programme Coordination

The CSR function falls under the Managing Director. The Manager Corporate Affairs will coordinate activities of the CSR programme under the direction of the CSR Management Committee and the Managing Director.
4. CSR FUNDING

The CSR programmes and activities will be considered as part of the KAA business and there will be a budget line in the corporate budget. However, the programmes and activities will be presented and approved by the respective committee taking into consideration the Authority’s priority areas of support and also the impact the CSR will have in the community. The overall budget for CSR will be determined annually by the main CSR committee in the head office.

5. FUND MONITORING

The following procedures will be followed for assessing CSR requests from the communities, partnerships and sponsorships.

(i) Requests for support will be received by the CSR Areas Operational Committee Chairman. Those which can be handled at area level will be dealt with there. The rest will be sent to the Manager – Corporate Affairs with recommendations for approval by the Managing Director.

(ii) The Corporate Affairs Manager will evaluate the requests as per the policy guidelines and make recommendations for adoption and approval by the Managing Director.

(iii) The CSR Committee will approve the CSR projects and pass the recommendations to the Managing Director for ratification.

(iv) All requests for support shall be informed of the outcome whether successful or otherwise. Staff members are encouraged to give proposals for CSR sponsorships on the attached CSR proposal form.

6. IMPLEMENTATION

(i) All CSR initiatives to originate from all the Authority’s facilities (including airports) and be forwarded to the CSR committee, as per the CSR template and in accordance with the annual plan.

(ii) Annual CSR initiative will be launched as a milestone activity during the first quarter of every year.

(iii) Ensure engineering project proposals by the Authority include a CSR agenda item and budgetary provision.
(iv) CSR interventions should secure media attention to deliver sustained visibility of Kenya Airports Authority work with the community throughout the year.

(v) Produce quarterly or bi-annual communication material – print and TV that is placed in the public media to generate the desired visibility on KAA’s work in the community.

(vi) The Corporate Affairs department in conjunction with Human Resources will set aside a “Make a Difference Day (MADD): Annual Kenya Airports Authority Community Week” where staff from all facilities identify long term projects and carry out community service on the projects. The Authority would provide the staff with the necessary tools to support the chosen interventions e.g. paints, cleaning implements etc.

(vii) The projects to be funded will be skewed in favour of communities living adjacent to the airports and airstrips and those affected by its activities.

7.0 CONCLUSION

Kenya Airports Authority is committed to meeting the aspirations as set out in this policy. In so doing it will adopt similar policies and arrangements which recognise its social, economic and environmental responsibilities so as to demonstrate to its stakeholders through statements and performance that KAA is committed to delivering value to society at large. An all inclusive CSR Strategy has been developed for implementation of this policy.

KENYA AIRPORTS AUTHORITY

CORPORATE SOCIAL RESPONSIBILITY PROPOSAL FORM

1. Name: ________________________________________________________________

2. Position______________________________________Date_______________________

3. Department
                                                                                       
                                                                                       
                                                                                       

4. Region/Airport
                                                                                       
                                                                                       
                                                                                       

5. Describe your proposed CSR activity and give reasons for your selection.
                                                                                       
                                                                                       
                                                                                       

7. How is your proposal aligned to the Authority’s CSR policy and guidelines? Explain briefly
                                                                                       
                                                                                       
                                                                                       

8. What is the estimated cost of the proposed activities?
                                                                                       
                                                                                       

9. Will you require other staff members to participate? Any other resources required?
                                                                                       
                                                                                       
                                                                                       

KAA ASQ AWARDS

[Airport Recognition & Mystery Shopping Program]

August 2023
The ACI Customer Experience Global Summit is the premier airport event dedicated to customer and employee experience.

2. Africa Customer Experience Overview

Africa has 26 airports participating in the ASQ program. The number of airports participating based on passenger traffic are <2M pax-11 airports, 2-5M pax-7 airports, 5-15M pax-7 airports and 15-25M pax-1 airports.

ACI-Africa holds two forums annually to discuss and deliberate best practices in the areas of facilitation and innovation, security, safety and technical, economics, environment and HRD.

The current ASQ Africa Customer Satisfaction Index stands at 3.83. The participating airports are ranked as shown;

Scores on a 5-point scale (1-Poor, 2-Fair, 3-Good, 4-Very good, 5-Excellent)
3. The Kenyan Customer Experience Context

KAA has 9 of its airports participating in the ASQ program; two airports, JKIA and MIA are participants in the quarterly ASQ surveys while the other stations are participants in the semi-annual ASQ surveys. The current Overall Satisfaction scores are captured in the table below;

Table 3: Internal ASQ Airports Customer Satisfaction Index (Q4 FY22-23)

<table>
<thead>
<tr>

<tr>
<td><strong>Overall (Corporate)</strong></td>
<td><strong>3.756</strong></td>
</tr>
</tbody>
</table>

The KAA ASQ scores depict average performance for all our airports and we need to improve service quality across the board.

KAA has set a corporate Customer satisfaction index of 4.3 as an aggregate score for all its airports. As of FY 2022/23, KAA had a CSI of 3.8, this presents a gap of 0.5, calling for deliberate strategic initiatives to achieve the corporate strategic target for the period 2023-28.

Figure 1: Trend in Overall Customer Satisfaction Index

![JKIA Customer Satisfaction Index Trend](image)

![MIA Customer Satisfaction Index Trend](image)

Scores on a 5-point scale (1-Poor,2-Fair,3-Good, 4-Very good,5-Excellent)
From the trend above, both airports had a drop in customer satisfaction index for the past three years, with a significant drop in the ratings for JKIA. From the research done in the past three years, the service delivery gaps were noted in the following key areas:

Table 4: Service delivery gaps

<table>
<thead>
<tr>
<th>No.</th>
<th>Issue</th>
<th>Focus Areas</th>
<th>Proposed Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Facility/ Product Gaps</td>
<td>(i) Leaking roofs (ii) Faded and stained walls (iii) Broken floor tiles (iv) Broken window louvers (v) Unserviceable lifts and escalators, etc. Maintenance- There is no proper maintenance plan for the KAA infrastructure, (Washrooms, charging ports/stations, screening machines, baggage belts, FIDs, etc.)</td>
<td>(i) Comprehensive Product Audit (ii)Structured Maintenance plan for all the infrastructure – washrooms, screening machines, baggage belts, FIDS.</td>
</tr>
<tr>
<td>2.</td>
<td>Staff Motivation and Airport Performance Recognition</td>
<td>(i) Low levels of staff courtesy and general motivation (ii) Lack of structured and harmonized airport initiatives to promote service excellence (iii) Uniforms-Staff uniforms maintenance and replacement process takes too long</td>
<td>(i) Comprehensive Airport Recognition Program (ii)Mystery shopping program – Customer simulation</td>
</tr>
<tr>
<td>3.</td>
<td>Weak Passenger Process</td>
<td>PSY – disorganized manual pax screening, pax being rained on etc. (JKIA and MIA). Technological advancements- upgrade the screening machines’ efficiency of the screening process, Information screens Wi-Fi availability and speed are slow and unreliable</td>
<td>Review the PSY security screening Reliable Wi-Fi</td>
</tr>
<tr>
<td>4.</td>
<td>Ambiance and Cleanliness of Airport</td>
<td>Airport environment- Minimal beautification initiatives at the airports, poor waste disposal &amp; recycling mechanisms Terminal Cleanliness and Cleanliness of washrooms</td>
<td>Full enactment of SLAs</td>
</tr>
<tr>
<td>5.</td>
<td>Retail Experience</td>
<td>Pricing – uncontrolled product pricing Product variety- No product differentiation offering at airports</td>
<td>Comprehensive retail audit and reorganization</td>
</tr>
</tbody>
</table>

For KAA to achieve the desired customer experience levels, deliberate efforts need to be put into the above gaps. To address service delivery gaps in Staff Motivation and Airport Performance Recognition; KAA seeks to implement a KAA-ASQ Recognition Program.
4. KAA – ASQ Recognition Program

The ACI World’s annual ASQ Awards recognizing airport experience is a successful program and has seen airports improve service delivery globally. Jomo Kenyatta International Airport has received the best airport in Africa in the category of 5-15M passengers three times; in 2012, 2020 and 2021. Moi International Airport on the other hand has received the best airport in Africa in the <2M pax category in 2020, 2021 and 2022. One of the deliberate areas of improvement in the top global airports is recognizing the efforts of airports in improving service quality and motivating employees.

Airports are recognized based on **Overall Satisfaction** Scores and top ratings obtained from the ASQ survey which include;

(i) **Most Dedicated Staff**,  
(ii) **Most Enjoyable Airport** and  
(iii) **Cleanest Airport**.

KAA implemented a successful Airport recognition and Employee Mystery-shopping program in 2012 which was complemented by a robust product improvement exercise. The results were evident with customer satisfaction ratings increasing to above 4.0 and both MIA and JKIA getting global accolades in the ACI’s renowned ASQ Awards program.

It is against this background that KAA seeks to reintroduce the Airport Recognition program, the KAA-ASQ Program. This is an internal program focusing on service delivery in airports and how to recognize and motivate excellence in the airports. The program shall complement the **Aviation Business Excellence Awards (ABEA)** program. ABEA’s objective is to promote excellence in service delivery across the stakeholder’s value chain. This shall give a 360-degree view of promoting service delivery excellence in our airports.

**KAA – ASQ Recognition Program**

<table>
<thead>
<tr>
<th>Program</th>
<th>Objectives</th>
</tr>
</thead>
</table>
| **Airport Recognition**      | To improve service quality at our airports  
|                              | Encourage competition and benchmarking within our airports  
|                              | Reward airports’ strategy and initiative in improving service quality                                                                        |
| **Mystery Shopping exercise**| Seeks to check whether staff comply with the guidelines and regulations  
|                              | To identify gaps and improve the friendliness of staff at the passenger touch-points                                                           |
1. **Proposed Approach to Airport Recognition Program**

The program is based on consumer feedback through the **Airport Service Quality Surveys**. The program allows airports to plan product improvements and promote local service quality through:

- ACI – ASQ benchmarking surveys done at JKIA & MIA (quarterly)
- Internal ASQ surveys done in all airports (bi-annually)

**Participating airports:**

- The criteria to join the KAA internal ASQ program is 100,000 passengers annually and at least 3 daily scheduled departure flights.

The airport recognition awards will be as follows;

**Table 6: Airport Recognition Awards**

**Frequency of Awards:**

The Airport Recognition Program shall be a bi-annual event.
2. Mystery shopping exercise

Mystery shopping is a method of testing the quality of services. It is used to test the quality of products, customer service and employee performance.

Objectives of Mystery shopping program:

a) Evaluating Customer Service: Mystery shopping programs allow businesses to gauge how well their employees interact with customers. This includes assessing whether employees are courteous, attentive, and helpful throughout the customer's journey.

b) Assessing Employee Performance: These programs provide insights into how well employees adhere to company policies and procedures. This includes evaluating whether they follow prescribed scripts, handle customer complaints appropriately, and exhibit professional behavior.

c) Measuring Product Knowledge: Mystery shoppers can assess whether employees have a good understanding of the company products or services. This helps identify gaps in training and knowledge that might need addressing.

d) Identifying Training Needs: By identifying areas where employees are falling short, businesses can tailor their training programs to address specific weaknesses, ensuring that employees are well-equipped to provide excellent service.

e) Monitoring Consistency: Mystery shopping allows companies to maintain consistency in service delivery across different locations. It ensures that the same level of quality is provided to customers regardless of where they interact with the business.

f) Uncovering Process and Policy Issues: Mystery shopping might reveal operational inefficiencies, bottlenecks, or policy gaps that hinder optimal customer service. This information can guide process improvements.

g) Enhancing Customer Experience: By identifying pain points and areas for improvement, mystery shopping programs help businesses enhance the overall customer experience, leading to higher customer satisfaction and loyalty.

h) Reward and Recognition: Positive mystery shopping results can be used to acknowledge and reward exceptional employee performance, boosting morale and motivation.

i) Identifying Fraud and Misconduct: In industries where compliance and ethical behavior are critical (such as finance and healthcare), mystery shopping can help uncover instances of fraud, misconduct, or unethical behavior.

j) Strategic Decision-Making: Insights gained from mystery shopping can inform strategic decisions related to, helping businesses allocate resources effectively.

k) Tracking Improvement Over Time: Regular implementation of mystery shopping programs allows businesses to track their progress and improvements over time. This helps in demonstrating the effectiveness of interventions and training efforts.

Overall, mystery shopping programs serve as a valuable tool for businesses to gain an objective understanding of their operations from a customer's perspective, leading to improvements in service quality, employee performance, and customer satisfaction.

~END~
MARKETING PLAN

2023/2024
MARKETING & BUSINESS DEVELOPMENT

To enable our airports to sustain their growth trends, our programs and activities for the financial year 2023/2024 will cover the following key areas;

1) Revenue generation
2) Branding & Product improvement/development
3) Marketing & Business Promotion
4) Research & Development
5) Customer Experience

1. REVENUE GENERATION

One of the core functions of Marketing & Business Development is to create, diversify and grow both aeronautical and non-aeronautical revenue opportunities for the Authority. This can be achieved through the following ways:

i. Diversification and expansion of the revenue sources
ii. Improved contract monitoring
iii. Increase aeronautical revenues
iv. Increase non-aeronautical revenues

2. BRANDING AND PRODUCT IMPROVEMENT

The role of Branding and Product improvement is to create a positive corporate image through brand positioning, continuous improvement/development of product portfolio, and increase customer satisfaction at every touch-point with the sole aim of maximizing revenue generation and growing the KAA market share.

OBJECTIVES

BRAND BUILDING & POSITIONING OBJECTIVES

- Position JKIA as the regional Hub.
- Positioning of the airport as the regional premiere HUB.
- Ensure the brand is clearly visible at and around the airports and create a great aesthetic appeal around the airport.
- Plan and execute effective service/facility campaigns to achieve business growth and a positive company image
- Development, implementation, and attainment of product and service standards at all Kenya Airports Authority airports
• Implementation and execution of effective promotional and communication programs to achieve business growth and a positive company image

PRODUCT OBJECTIVES

• Systemic facility audits at all passenger/aircraft contact points to enhance customer experience
• Diversify the range of services offered and ensure the optimal utilization of existing space
• Implementation of continuous product improvement and development at all passenger touchpoints to achieve high levels of customer satisfaction and a positive company image.
• Provides source data for product line communications by defining product marketing communication objectives, launches, campaigns, and activations.
• Develops product Service Level Agreements (SLAs) and monitors/evaluates services delivery to set standards
• Keeps track of new global trends in airport services/new and emerging trends in the industry and ensures KAA stays in the leaders’ quadrant in providing services consistent with the brand position

3. MARKETING & BUSINESS PROMOTION

We hope to undertake various Business promotion/sponsorship initiatives aimed at showcasing our airports’ facilities and services, as well as creating strategic partnerships through benchmarking, in order to foster growth and sustainability.

4. RESEARCH & DEVELOPMENT

We shall continue to conduct customer surveys across various airports to gather valuable insights into passenger satisfaction, preferences, and expectations. These surveys will capture each airport’s strengths and areas of improvement on all relevant products and facilities at every passenger touchpoint.

5. CUSTOMER EXPERIENCE

• To improve overall customer satisfaction by the end of year by implementing actions identified in the various surveys.
• Improve Employee Satisfaction index (ESI)
• Improve the Work Environment Index (WEI)
• Improve Customer Satisfaction Index

V. RETAIL, CONCESSION & BUSINESS DEVELOPMENT ACTION PLANS

Objectives;

1. **REVENUE DIVERSIFICATION AND GROWTH**
   - Diversification of (revenue) sources and development of new business services – real estate (land use) developments at key airports.
   - Introduce at least new 02 products and services
   - Roll out and expansion of ePOS System installation at JKIA & MIA.
   - Review policy on leases, licenses and concessions.

2. **AIR SERVICE / ROUTE DEVELOPMENT**
   - Establish and implement air service Incentive programme for JKIA & MIA.
   - Facilitate at minimum the introduction of 02 new international routes at JKIA and 01 in MIA
   - Promote Air service development in EIA, KIA, WAP and other Auxiliary Airports.
   - Collaborate with the GoK and KQ-Base (Home) Carrier – MOT to endure ease of growth of Air service development in Kenya.

3. **CONTRACTS MANAGEMENT / MAINTENANCE**
   - Improved contract monitoring; by active engagement in Contract and Agreements development and review.
   - Ensure all retailers and concessionaires have valid SLA.
   - Monitoring of performance in compliance to SLAs and Standards.
   - Ensure full implementation of the REFX BPR scope to facilitate ease of contract management.
ACTION PLANS

To achieve our objectives the following action plans aimed diversifying revenue generation shall be undertaken during the year 2023 / 2024.

VI. REVENUE

1. ROLL OUT OF THE EPOS SYSTEM

<table>
<thead>
<tr>

Service Quality Survey Findings

Q1 FY 2023-24
Overall Satisfaction: 3.71

Category Scores:
- Arrival at the Airport: 3.81
- Security Screening: 3.77
- Shopping/Dining: 3.28
- Throughout the Airport: 3.69
- Check-in: 3.84
- Border/Passport Control: 3.92
- Gate Areas: 3.73
- Airport Atmosphere: 3.80

Overall Experience by Emotional State:
- Negative Emotions: 2.21
- Neutral Emotions: 3.26
- Positive Emotions: 4.14

Overall Satisfaction by Traffic Type:
- Domestic: 3.50
- International: 3.77

Overall Satisfaction by Reason to Travel:
- Business: 3.72
- Leisure: 3.64
- Personal: 3.79

ASQ Indexes:
- Ease of Travelling Index: 3.85
- Waiting Time Index: 3.69
- Staff Index: 3.88

Passenger Emotions:
- Safe and Secure: 4.19
- Happy: 3.86
- Excited: 3.66
- Confident: 3.91
- Relaxed: 3.96
Methodology

ACI ASQ Departures is a benchmarking programme measuring passengers’ experience while they are at the airport.

In today’s competitive world, providing a service is not enough. Consumers are expecting an experience.

- **Service quality** is about customers evaluating the quality of each step required to deliver a service.
- **Customer experience** is about what customers feel and remember of the service quality delivered.

The ASQ Survey’s main objective is to provide the participating airports with the research tools and consumer insights to better understand passengers’ views with respect to the overall journey at the airport:

- How passengers rate an airport’s services
- How an airport compares to others around the world by traffic type, size, region, etc.
- Which aspects are of particular importance for a specific airport
- How does the satisfaction impact passengers’ emotional state and experience
- How passengers’ perceptions and priorities are evolving over time
Passenger Profile
Demographics

Gender
- Male: 59%
- Female: 40%
- Other: 1%

Age
- 16-24: 17%

The figure presents the proportion (%) of respondents who mentioned the item amongst the most important items based on their experience at your airport. Because respondents were able to select several items, the total of mentions may exceed 100%.

The figure presents the average (out of 5-pt scale) for the items identified as important amongst all of the respondents who have rated the item.

7. **Cargo** ....................................................... Pg 291

8. **Appendix 3 (Cargo)** ....................................... Pg 30-38
INTRODUCTION

The KAA Product Audit entails assessing of facilities, services and processes to check for compliance to specified product development processes and to identify gaps that may pose a threat to the Authority’s brand image and overall customer experience through our Airports. This exercise also helps to evaluate whether our various products are up to international standards and provides an opportunity for development and exploration of new products.

In February 2022, we conducted a Product Audit of JKIA and developed a report which not only highlights the shortfalls at specific touchpoints of the Passenger’s journey, but also recommends targeted solutions that may be implemented immediately and over the course of time.

Objectives

The objective of this exercise was two-fold:

i. To go through the customer journey, investigate and examine the facilities and services of our airport and pick out the prevalent issues;

ii. To identify and recommend New/ improvement opportunities for product enhancement

| 1    | Journey to Airport            | Mombasa road   | - Traffic caused by obstructing *Matatus*, causing unnecessary strain on motorists trying to access the airport.  
- Many motorists who are not familiar with mombasa road get lost and unintentionally find themselves in the Airport.  
- The JKIA sign at Mombasa Road is at the middle of the road, awaiting destruction.                                                                                                                                                                                                 | - Install/Reinforce signage from Cabanas indicating to and guiding motorists/passengers on Lane leading to airport. Signs should be properly lit for night visibility.  
- The JKIA sign at the entrance should be centralized to be seen clearly.  
- Relocate of the JKIA sign at Mombasa road to an off-road position that is more safe and visible.                                                                                                                                                                                                 | - External Signage Contractor                                                                                                                                                                                                 | Marketing            |
<p>|      |                                |                | - Congestion due to the on-going construction on Mombasa road                                                                                                                                                                                                                                                                                                        | - Introduce a <em>Traffic Forecast</em> portal in our Communication platforms like the Website to warn Passengers/Motorists on                                                                                                                                                               | - No Cost. Collaboration with Traffic Police, KENHA, and other relevant Stakeholders.                                                                                                                                          | Communications       |</p>

GENERAL OBSERVATIONS /CONCLUSION

- There is need to adopt a pre-emptive approach when dealing with maintenance issues around the airport.
- We are running the risk of giving our Passengers an information overload as there are a lot random notices, Policy documents, Security information plastered all around the terminal buildings, which effectively create a lot of confusion and clutter. There is therefore an opportunity to use technology to disseminate important information.
- We need to deliberately start sharing and enforcing our standards and guidelines with all airport users.
- It appears there is a shortage of cleaners and it’s starting to impact on the levels of cleanliness and hygiene in the terminals.
- Terminal 2 is underutilized; opportunities to maximize its usage can be explored.
- Our Meet & Greet Experience is not elaborate.
- Overall, our facilities require proper facelift, especially at Cargo.

Introduction.

This document provides a simple, yet robust set of Brand Guidelines that can be easily understood and communicated while leaving room for creative expression.

This manual will guide you through some of the basic identity elements (such as logo, typeface & colour) and will provide some general rules for applying these elements across a variety of media types.

This manual contains details of the rules and guidelines on various KAA standards applicable to all company operations and applications. It is intended for use by all those with the responsibility of applying the KAA visual identity and it sets out the rules and guidelines clearly which must be followed in order to maintain consistency.

While we prefer a standardized brand identity there may be situations that require a customized solution.

For advice on applying the brand identity outside of the guidelines, please contact The Brand and Product development section of the Marketing and Business Development Department.

Our Mandate

The Kenya Airports Authority (KAA), established in 1991 under KAA Act, Chapter 355 of the Laws of Kenya, provides facilitative infrastructure for aviation services between Kenya and the outside world. Its main functions are:

1. Administer, control and manage aerodromes.
2. Provide and maintain facilities necessary for efficient operations of aircrafts.
3. Provide rescue and firefighting equipment and services.
4. Construct, operate and maintain aerodromes and other related activities.
5. Construct or maintain aerodromes on an agency basis on the request of any Government Department.
6. Provide such other amenities or facilities for passengers and other persons making use of the services or facilities provided by the Authority as may appear to the Board necessary or desirable.
7. Approve the establishment of private airstrips and control of operations thereof.
Logo Introduction

Rules for Our Logo:
1. Never substitute colours or change the logo. Even if these colours form part of the corporate identity colour palette.
2. Never stretch or distort the logo in any way. Even when fitting it into a small or tight area ensure that the proportions remain the same.
3. Never use only part of the logo.
4. Never fade or add effects onto the logo.
5. All these rules also apply to the Kenya Airports Authority holding device with logo and taglines.

Logo - Colour Variation:
1. The Kenya Airports Authority Corporate Identity should always appear on a clear white, blue or Kenya Airports Authority Yellow background.
2. For full colour reproduction, you may use the process breakdown to match the respective Kenya Airports Authority Colours.
3. For black and white, use either Greyscale or Black and White colour variations.

Logo - Positioning and size:
In order for the Kenya Airports Authority Corporate Identity to be legible and visible we recommend that:
The Kenya Airports Authority logo should not be smaller than 2cm, due to legibility. However, the minimum size is not restricted when the need may arise.
The Kenya Airports Authority logo should have unobstructed equal space around it. This is to create legibility and impact. Text, textures and images should not be close to the Kenya Airports Authority logo. Placing the Kenya Airports Authority logo or reversing it out of images is not advised.
At all times the Kenya Airports Authority logo must be reproduced from the Master Artwork.
Refer to manual artwork and stick to instructions in this manual.
DO NOT recreate the Kenya Airports Authority logo.

Logo - Placement with Other Logos:
When the Kenya Airports Authority logo is used with another logo as a unit on printed matter such as brochures or advertising, a clear area must be left around both logos to ensure that it is not crowded by other images or text.
The clear space of about 1cm must be used to separate the logos and at all times, the Kenya Airports Authority logo used with another logo must be reproduced from the Master Artwork.
Refer to manual artwork and stick to instructions in this manual.
Correct use of the word Kenya Airports Authority:
Kenya Airports Authority
The Kenya Airports Authority
Kenya Airport Authority
Kenya Airport Authorities

Logotype.
The Logo Title.
Do and Don`t
The Kenya Airports Authority logo may not be used in any manner other than that prescribed in this manual. It is not permissible to add or subtract, alter or distort the Kenya Airports Authority namestyle or the Kenya Airports Authority symbol. Examples of unacceptable applications of the Kenya Airports Authority logo:

- Co-branding

Examples of co-branding applications of the Kenya Airports Authority logo:

---

Engage Today, Impact Tomorrow.

KAA (Kenya-airports Authority) is committed to supporting AMIC (Airport Management & Investment Committee) initiatives, setting our sights high. The company’s mission is to provide innovative and world-class solutions, setting the pace for Africa and beyond.

Date: 14th March – 15th March, 2023
Time: 9:00 AM – 5:00 PM

Theme: “Bridging Gaps, Innovating Tomorrow’s Airports”
Typography

To ensure clarity of all brand communications, the brand’s typography and its use should be consistent.

Optima

The primary typeface for use in all Kenya Airports Authority advertising communications is Optima, an ideal typeface for text in publications featuring large amounts of copy.

This section contains details on how to maintain the visual integrity and legibility of the Kenya Airports Authority logo on signage. Please refer to the Signage manual for application guidelines and best use of the Kenya Airports Authority symbols on signages.
Conclusion.

As seen in the Manual, the Corporate Identity for Kenya Airports Authority has an important part to play in establishing our corporate identity throughout our organization. All company employees involved in the usage of this manual in any way should ensure that the company’s visual identity/standard is strictly adhered to in all context thereby ensuring that our corporate identity is uniform throughout the organization.

Needless to say that each finished item should be of the highest finish and quality. Every effort has been made to ensure that this identity manual covers the application of the Kenya Airports Authority Corporate identity in the simplest form— for any clarification before commencing on the application of Kenya Airports Authority corporate identity please forward layouts to the Brand & Advertising Office, Marketing & Business Development Department.

SUMMARY

The Retail Design Standards Manual provides a framework for illustrated principles geared towards steering retailers into a unique and dynamic designs. The designs are consistent with the unified aesthetic and functional vision of the airport. This is in line with KAA’s commitment to providing pleasant ambience to passengers. We developed the Manual through elaborate discussions with stakeholders, staff and benchmarks with top airports. The document outlines the elements which make the KAA retail brand while illustrating how the brand should be applied throughout the customer journey.

Specifically, the manual is generally intended to accomplish the following:

- Inform the Retailer of the Authority project management controls and guidelines
- Define Retailer design team responsibilities
- Identify critical milestones/coordination points to facilitate project success
- Provide a design and construction work plan
- Establish minimum design criteria

Kenya Airports Authority will work in close collaboration with the retailer and its Stakeholders to properly interpret these guidelines, while retaining control of the design process. This collaboration and interpretation will apply to both the common areas and the retailer’s storefronts and interiors that fall within the agreement terms.

Please refer to this brand book when developing any space, building and interior fittings and if you have any questions, contact the marketing team at M&B@kaa.go.ke, Brand and product development section.

APPENDIX
1. INTRODUCTION

These Retail design principles provide visual analogies and examples of stated principles. It allows the retailers ability to incorporate its unique design and operating philosophy on the completed project. The recommendations and requirements herein are to steer retailers into the future with the highest quality retailers while maintaining a unique and special character.

KAA is committed to providing an attractive, pleasant ambiance for passengers, terminal users, and retailers at its airports via innovation and process involvement.

KAA encourages dynamic retail store and restaurant designs that are consistent with the unified aesthetic and functional visions of the airport, and also add physical expression of the Authority’s goals for the retail program. In particular, the Authority expects retailer to create a sense of place through unique, inviting, and original designs that capture the spirit of the Kenya.

This Retail Design Criteria Manual will familiarize Retailers with the various special conditions of its airports and offer their design and construction teams guidelines for preparing and submitting designs for review and approval.

Dimensions and details of existing building conditions shown in the Retail Design Criteria Manual are intended for reference only. It is the responsibility of the Retailer to confirm existing conditions and to document any deviation in the existing condition with actual details for the Authority’s review and approval.

Retailers should become familiar with these documents and be responsible for remaining current on revisions to these documents. The documents are considered to be dynamic in nature and may change from time to time.
2. GENERAL GUIDELINES FOR THE RETAIL OUTLETs

2.1. Storefront
• All interior fit outs should reflect modern technology in relation to airport theme.
• Where a concourse is applicable. The projection into the concourse must not negatively impact way-finding or passenger circulation.
• The neutral frame is recommended for demarcation between retailer and base building finishes to give the storefront a seamless design look. (Applicable to shops adjacent to walls)
• For openness and transparency, retailers are required to maintain a minimum 60% transparency on all sides (Subject to approval by KAA)
• Materials used shall be extremely durable, high quality, easily maintained and fire rated

2.1.1 Features
• False middle column
• 15 column power/data cable
• 15 floor power/ data cable
• Storage
• Gypsum bulkhead for branding
• Anchorage for sliding grill shutters

NB: All finishes are subject to the Authority’s approval.
2.2 Merchandise Displays

Merchandise display designs are critical in expressing the theme of the concessionaire as well as maintain the modern technology in relation to airport theme.

Material of display case must be:
- Clear acrylic
  - Glass
  - Stainless steel
  - Wood
  - Wire rack

- All displays visible to the public are restricted to durable, non-porous, easily cleanable materials, Light fixtures illuminating the case shall not cause glare into the public view.
- The fixture layout should allow for ease of access for passengers with baby strollers, luggage carts, hand-held luggage, bag carts, and baby strollers, as well as persons with reduced mobility (PRM).
- All take-away counters must have a section that meets PWD accessibility requirements at the point of sale.
- All pieces be arranged in accordance to height.
- Displays providing direct service must be set back (Subject to approval by KAA) from the lease line to provide adequate circulation and queue space.
- Shelving units can only be installed to a height of choosing shelving units with a maximum depth of 600mm.
- All displays must have proper reinforced backing.
- All goods shall be placed only on the inner perimeter of the shop and not on the exterior/ hooked to columns.
- Display shelves should be lockable for security purposes to maintain the open plan design throughout the terminal.
- Retailers may choose to apply letters or logos on the inside surface of the display case glass. Letters and/or logos shall be sized appropriately to maintain clear views. (Subject to approval by KAA)

2.2.1 Features

- False middle column
- 4 column power/data cable
- 4 floor power/ data cable
- Gypsum bulkhead for branding
- Anchorage for sliding
2.3 Flooring Materials and Transition
KAA has provided a design floor for the terminal for all retailers;
• The floor finish is Marmoleum, porcelain or ceramic tiles (subject to approval) and should the retailer
desire to change the floor finish within their perimeter it must be approved, be of 2.5mm thickness and be
of similar ground level to the existing surrounding finish.
• If damage has occurred during construction, the retailer is required to repair and replace adjacent Airport
flooring within the entry zone at the front of the storefront enclosure to provide a continuous floor
material, to the extent of the damage.
• If the retailer’s space requires floor penetrations, the retailer should consult the authority’s representative.
• The retailer is to control water from drilling or cutting operations. Surfaces below such operations must be
protected. The retailer is responsible for the cost of any damages sustained during such procedures.
• Retailers are not permitted to construct mezzanines or raised platforms in their spaces without the written
approval of the Authority.
• If an expansion joint occurs within the retailer space, it shall be the retailer’s responsibility to maintain the
integrity of this joint. The retailer must install the finish material to the joint in a professional manner that
is consistent with the architectural approach throughout the Airport Terminal.

2.4 Ceilings, Interior Walls and Doors
• All interior fit outs should reflect modern technology in relation to airport theme.
• Branding of the shop will be done on the gypsum bulk head
• All suspended gypsum ceiling to remain intact as per the design
• Only the ceiling section with the 600x600mm perforated aluminum ceiling can be changed.
• Ceiling materials used shall be extremely durable, high quality, , easily maintained and fire rated
• All damage to existing ceilings will be repaired by the retailer at the retailer’s expense. All repaired ceilings must
match the existing construction exactly.
• Ceilings in food and beverage spaces are to comply with all governing Health Department requirements.
• For base building columns adjacent or within retailer space, the retailer shall be left as it is.
• All finishes on interior walls and doors are subject to the Authority’s approval.
3. SPECIAL REQUIREMENTS FOR FOOD AND BEVERAGE RETAIL OUTLETS

3.1 General Design Guidelines

- Food and beverage retailers are required to meet all Health Department requirements.
- Food and beverage retailers are required to use non-porous, cleanable materials for ceilings above the preparation and serving areas.
- If the food retailer preparation area is an integral part of the visible service area, it must meet all storefront criteria for finishes and lighting.
- If the food retailer preparation area is not intended to be part of the visible service area, a separation wall is required, and all doors must have automatic closers. Any food pass-through openings are to be minimal in size and are subject to the Authority’s approval.
- Any clutter or unsightly equipment such as boxes, shelves, sinks, etc. are to be fully concealed from public view.
- Major cooking not allowed and the kitchen must have extract system for smoke and fumes.
- Gas is not allowed within the terminal and most of the Airsides use electricity for their cooking equipment.
- All Airsides use a combination of voltage panels (Subject to approval by KAA) to feed all cooking loads. All the furniture shall be as per the approval of the authority’s representative.

3.2 Take-Away Counters

- Particular attention shall be given to the visual organization of the product display areas. Equipment layout, graphics and materials shall be submitted to the Authority for approval.
- All counters and back walls visible to the public are to be restricted to durable, non-porous, easily cleanable materials.
- Approved countertop and counter-front materials include:
  - Clear acrylic,
  - Glass,
  - Stainless steel
  - Wood
  - Wire rack
- Customer queuing must occur within the Retailer lease line or well outside of primary passenger circulation areas.
- Queuing plans shall be included in Retailer’s design submittal to the Airport for review and approval.
- All counters must conform to the Kenya Persons with Disabilities Act requirements and all applicable laws.
- Trash receptacles for customer use must be concealed in furniture or built into the countertop millwork.
- Napkins, condiments, utensils, straws, and trays must be set back from the front of the counter and dispensed from permanent holders recessed into the front countertop or adjacent area.

3.3 Display

- Specific requirements for display of food and beverages include the following: Approved countertop and counter-front materials include:
  - Clear acrylic,
  - Glass,
  - Stainless steel
  - Wood
  - Wire rack
- All display cases must be lighted and vented. Light sources must not be visible. The sides and back of the inside of the case may be mirrored.
- No displays or signs are permitted in the public concourse beyond the identity control zone.
3. SPECIAL REQUIREMENTS FOR FOOD AND BEVERAGE RETAIL OUTLETS

3.4 Grab & Go Units
- All interior fit outs should reflect modern technology in relation to airport theme.
- Branding of the shop will be done on the gypsum bulk head.
- Display case must not exceed 50 cm in height from counter top.
- Shelving units can only be installed on the inner side of the shop where need be to suit storage products involved and shall not hang from the ceiling area nor be placed on the existing columns.
- Shelving units should start at 200mm off the ground level and end 200mm off the counter level.
- Shelving units have a maximum depth of 600mm and serving points be free of obstructions to avoid accidents.
- All goods shall be placed only on the inner perimeter of the shop and not on the exterior / hooked to columns.
- Customer queuing must occur within the retailer’s lease line or well outside of primary passenger circulation areas.
- Queuing plans shall be included in retailer’s design submittal to the KAA for review and approval.
- All counters must conform to the Kenya Persons with Disabilities Act requirements and all applicable laws.
- All walls and surfaces visible to the public are restricted to durable, non-porous, easily cleanable materials.
- Materials are limited to the following:
  - Clear acrylic,
  - Glass,
  - Stainless steel Wood
  - Wire rack
- If provided, trash receptacles for customer use must be concealed or built into countertop millwork or enclosed in furniture that blends with the design of the space and meets the design requirements for counters.

Features
- False middle column
- 4 column power/data cable
- 4 floor power/data cable
- Storage
- 4 wall power/data cable
- Gypsum bulkhead for branding
- Anchorage for sliding grill shutters
3.5 Menu Boards

Menu boards shall be professionally designed and produced to be an integral part of the restaurant/ grab and go units’ general design concept. The menu board layout, letter style and quality of color illustration or photography, plus fabrication technique shall be submitted to Airport for review and approval prior to fabrication.

- Menu boards must be permanent in nature and shall be mounted behind the primary service counter, to an available wall surface, most likely on the wall behind the cash wrap.
- Customized menu boards with an artisan quality and illumination by surface light fixtures are most desired. Internally illuminated menu boards are not acceptable.
- Construction may be of smooth finished or painted wood, metal, glass or resin panel.
- Individual, dimensional words attached directly to an opaque wall or surface most likely on the opaque kitchen / refrigerator / storage enclosure or canopy is acceptable.
- The surface of the menu board must be of a non-glare material to ensure comfortable visibility and maximum legibility.
- The placement of the menu boards, their height above the floor, and the size of the text used in listing the menu items and prices shall be designed so as to be legible prior to the “order here” point in the queue.
- Photographs of food or beverage are not encouraged but are acceptable on the menu board provided they are designed as an integral part of the menu board. Photographs shall be professionally produced and must accurately represent the products being sold.
- Additional signage on the menu board is limited to one designated retailer’s trade name or logo.
- Nationally and/or internationally recognized branded logos of menu items being offered are acceptable as additional signage subject to Airport approval.
- Movable, portable, temporary, and hand-written signs are not acceptable.
4. SIGNAGE

Signage is a major visual element to be provided by the Retailer. Imaginative, progressive, and creative signage is essential to the success of the concessionaire’s store. Signage shall be designed, fabricated, installed and maintained by Retailer at Retailer’s sole expense. Retailer signage must not interfere with the Airport Wayfinding Signage.

All retailer sign designs, locations, and placement are subject to approval by the Authority, which may be withheld at the Authority’s sole discretion. Retailers are required to coordinate mandatory and supplemental signage into a complementary design.

4.1. General Requirements

Regardless of location, all retailer’s signage will be subject to the Authority’s review and approval. The signage should be visible and no retailer signage shall interfere with passenger way finding, or block air diffusers, lighting, speakers, or cameras and passenger movement areas. Retailers must coordinate their signage to avoid potential conflicts.

• Brand names, product names, or phrases may not appear on the storefront or store enclosure unless approved by the Authority.

• Decals or other signage indicating product lines or credit card acceptance is not permitted on the storefront.

• Temporary signs, banners, sales notices, etc., are not permitted on the storefront.

• All attachment devices, wiring, clips, transformers, lamps, tubes, and other mechanisms required for signs must be concealed.

• Conduit, transformers, and other related equipment should be completely concealed from view.

• The location of all openings for conduits and sleeves in sign panels should be indicated by the retailer’s sign contractor on signage shop drawings submitted to the Authority for review and approval. The sign contractor shall install the product(s) in accordance with the approved drawings.

• Any damage to any other work caused by the retailer’s sign contractor will be repaired at the retailer’s expense.

• The retailer will be fully responsible for the workmanship and installation of retailer’s sign and coordination of the sign contractor and their sub-contractors.

• No sign fabricator labels or other identification should be in an inconspicuous location.

4.2. Sign Materials and Construction

Retailer signs should be visually distinctive from wayfinding signage. Size, character, typography, composition, illumination, and height are important factors that make every storefront sign unique.

The following sign types are appropriate, and their use is permitted with the Authority’s approval:

• Dimensional, non-illuminated wood, metal, plastic, glass, or other material with a permanent appearance.

• Dimensional, illuminated, halo, or back-lit individually mounted letters.

• Dimensional letters of not less than 1” or more than 3” in depth, which must project from the storefront with 1” spacers.

• Etched, beveled, sandblasted, or stained glass.

• Internally illuminated channel letters with opaque metal sides and plastic face. Internally illuminated letters must not be less than 1” nor more than 4” in depth. Raceways are not allowed.

• Moving, rotating, or animated signs in the Identity Control Zone with the Authority’s approval. Such signs must not interfere with the way-finding signage and terminal operations.

The following sign types, sign components, and devices will not be permitted:

• Boxed or cabinet type, Formed plastic, Cloth, paper, cardboard, or similar stickers or decals, Noise making, Odor producing, Flashing, Exposed labels of manufacturers, underwriters, etc., Veneer or plywood products, Pre-molded plastic letters with reflective coatings, Hand lettered non-professional signs, Free-standing pedestal/stanchion signs

The following sign materials are appropriate, and their use is permitted with the Authority’s approval:

• Wood, Metal, Plastic, Glass (etched, beveled, sandblasted, or stained), Other material with a permanent appearance that fits within the prescribed mounting system

Illuminated Signs:

Where illuminated signs are required or considered, the following restrictions apply:

• All illuminated signs must be turned on during the terminal’s retail operating hours. The use of an automatic timing mechanism for signage, Identity Control Zone lighting, and cabinet window lighting is mandatory.

• The Authority must approve any use of neon.

• Signs must be constructed so lamps or other illumination components are easy to replace. Ballasts should be accessible from within the retailers space and must be concealed.

• Video equipment used for illustrating products or for promotions may be restricted if located within the Identity Control Zone. All video equipment is subject to the Authority’s approval.

Non-Illuminated Signs:

Non-illuminated signs are viewed as decorative as well as informative and are subject to the Authority’s approval. Note the following:

• Letters or logos applied or painted directly on the inside face of glass storefronts are not generally not permitted unless they are used as a safety band.

• Height for safety band name or logo should not exceed 4” unless required by code.

• Hand lettered, non-professional signs and newspaper advertisements are not permitted in the Identity Control Zone.

• Additional signs or promotional for brand names (e.g., soft drinks) are not permitted without the Authority’s approval. All graphics must have a non-glare, matte finish. The type must be large enough and its style simple enough to make the text clearly legible.
4.4. Sign Types and Mounting

Each retailer is required to design, fabricate, install, and maintain its own signage. The following are the primary signage categories for retailers:

- Storefront signs
- Seating area signs
- Kiosk signs

4.4 Hours of Operation signs

All Concessionaires are required to furnish and install one sign indicating the store's hours of operations that adheres to the following criteria.

- This item shall serve to unify all concessionaire locations regardless of Airside and provide a consistent branding message for the airport.
- Hours of operations signs are to be (Subject to approval by KAA).
- Font size for the store name or store logo and the hours and days of operation must be legible from 3 feet away from the mounted sign.
- The board should be double sided to enable flipping on either side
- The hours of operation signs are to be used if and when applicable

4.5 Sign Mounting Criteria

The permissible area for retailer’s signage varies by building location and design conditions. Screw-on mounting for surfaces where pressure-sensitive installation is not applicable. Refer to the following figures for possible retailer sign sizes and locations.
5. LIGHTING AND SOUND

5.1. General Lighting
General lighting is provided by the authority unless on instances of temporary light use. The retailer’s space has six twin sockets and four data points. All power within the tenet space will be metered.

Retailer Lighting Standards
Lighting within the retailer’s space will be provided by the retailer, including but not limited to:
- General illumination lighting including dimmable systems.
- Task, decorative, display, and advertising lighting, which will be the sole responsibility of the retailer.
- All circuits required from the retailer’s sub-panel.

Fixture types and lamps shall be selected on the basis of fixture efficiency and economic adaptation to the particular lighting task. All light fixtures shall be efficiency and commercial grade. Subject to approval by the Authority.

Lighting of offices shall be recessed lensed troffers or volumetric (fluorescent or LED) luminaries.

Standard lighting sources by order of preference include the following:
- Light Emitting Diodes (LED)

Lighting density allowances are (Subject to approval by KAA) 400 Lux AND below

5.2. Acoustics and Public Address
The terminal Public address system takes precedence at all times and should always be audible in all areas in the terminal.

5.2.1. Acoustics
Retailers are required to minimize the transmission of sound from its space to the concourse and adjacent retailers. The retailer must provide the following as a minimum:
- Minimum partition for critical noise adjacencies such as beverage retailers, food preparation, cleaning areas, and dish washing adjacent to sensitive retailer shall be (Subject to approval by KAA) with consideration for plumbing noise vibration isolation. Higher values may be required based on space planning.

Music and background paging systems are permitted with the Authority’s approval. The volume of sound must be controlled to limit the levels to the retailer space and not intrude into adjacent spaces or public circulation.

The Terminal Background Paging System and Emergency Messaging System must be clearly heard without interference from retailer sound systems. Music in retailer spaces must be “cut-off” during life safety announcements.

5.2.2. Public Address System
Retailers may have speakers for a background music system inside their spaces under the following conditions:
- No music should be contained inside the retailer’s space, expect the airline lounges.
- Sound pressure levels outside of the retailer’s space due to music shall be (Subject to approval by KAA).
- Small kiosk or grab & go are not allowed any type of music.
- TVs allowed with minimum restrictions but sound must be controlled
Please contact the Authority if the retailer desires to have a background music system with cut-off during
6. APPENDIX

You will note here examples of retail venues from other airport facilities with small textures or bold colors, which work where there are expansive ceiling heights and perhaps relate back to sand on the bay.

Each relate to Quintessential Tampa.
KAA
WAYFINDING & SIGNAGE MANUAL
KAA WAYFINDING & SIGNAGE MANUAL
Introduction

Guiding users to and through an airport is a particularly complex activity, especially around some of the large international airports, some of which might be thought of as mini-cities. It is very important for passengers to clearly understand how to get around from entry into the airport to their departure. Clear signage makes this easier.

The Wayfinding Signage Manual will:

• Improve signage standards within the Airports.
• Give airport users the information they need, when they need it.
• Improve visual consistency through standardised fonts, standardised use of colour and standardised signage sizes depending on where they are placed.
• Result in a comfortable and user-friendly environment in which passengers and other users of the Airport facilities shall navigate with ease without having to ask for help or feeling lost.
Wayfinding and Signage

• The standards will assist the authority in delivering information to passengers and stakeholders within the Airport.
• It includes information and advice on signage practices as well as guidance on designing the actual signs and is intended to provide a reference and instruction on the important aspects of signage as well as sources for more detailed and specific information.
• This is a detailed corporate signage manual that includes but not limited to:
  1. Colours
  2. Signage types
  3. Text and translations
  4. Fonts
  5. Symbols/arrows
  6. Sizes
  7. Description of each sign location, to follow the passenger points of contact
Wayfinding sign placement

The effectiveness of a wayfinding program depends on the communication of information to the viewer in the proper sequence and at the proper locations.

Continuity—A successful wayfinding system provides information with sufficient frequency to guide and reassure the user.

Connectivity—Successful wayfinding design requires an understanding of the physical space, users, and destinations to determine the best way to move people safely and efficiently, and to use signage to deliver routing information to the viewer.

Consistency — in appearance, messaging and placement throughout the airport facilities helps the viewer quickly recognize, understand and use the information provided.

Sign placement is also an important factor in the visibility, legibility and readability of information on the sign.

General guidelines for sign placement:

1. Locate signs at or near decision points with consideration for the viewer’s path of travel.
2. Place signs perpendicular to path of travel.
3. Place signs for maximum visibility within comfortable field of vision and viewing angle.
4. Place signs at consistent heights and on uniform mounting surfaces whenever possible.
5. Locate signs with sufficient frequency to ensure viewers do not feel abandoned.

Roadway signage placement:

1. Locate signs in advance of decision points in order to allow motorists time to process directional and lane assignment information and react without endangering themselves or other motorists.
2. Size text and graphics appropriately for the intended viewing distance.
3. Locate signs within the driver’s normal cone of vision.
4. Locate signs so they are not obscured by vegetation or other structures.
5. Avoid locating signs so as to interrupt necessary pedestrian pathways.
Vehicular Viewing Legibility

Vehicular Viewing Distance and Angle
Pedestrian signage placement

- Establish consistent viewing zones and mounting heights for way finding.
- Locate interior signage in accordance with ADA and ADAAG standards.
International Examples: Airport Colour Schemes

Regulatory Colours
- PANTONE 1225C
- PANTONE 287C
- PANTONE 7620C
- PANTONE BLACK 6C
- PANTONE 7732C
Signage Considerations

1. All primary signs should be on Pantone 287C with primary text in white and Pantone 1225C for secondary text (translations).
2. All secondary signs should be on Pantone 1225C with primary text in Pantone 287C and black text for secondary text (translations).
3. All arrows and icons on primary signs should be in opaque white.
4. On secondary signage all arrows and icons need to be in Pantone 287C.

Language

Consistency in nomenclature is essential to effective communication in a Signage program.

- We will use commonly understood standard terms
- We will use the same terms consistently for destinations and services.
- Use English and Swahili for signs (associate with symbols where appropriate to reinforce comprehension).

Overview

An effective wayfinding program consists of signage that is consistent in appearance and application, allowing the viewer to become familiar with the system and use it efficiently.

**Purpose:** The purpose of this section is to establish uniform standards for typography, symbols, arrows, iconography, colours, and graphic layouts for all signs in the airport wayfinding program.

**Graphic Standards Guidelines:** The following pages contain specific guidelines for sign formats and layout, typeface families, arrows, symbols, and colour standards. These guidelines are reflected in the designs for the new sign families. In addition, these guidelines should be followed for the design of any additional sign types required at all KAA airports in the future.
Typography

CORISANDE BOLD

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890

All primary text is done in Corisande Bold font.
Secondary text is 50% smaller than the primary text in Corisande Bold.
Symbol Sizing

The size of the symbols used are usually so related with the distance that the person viewing the signage is standing. The further the sign the larger it should be for legibility purposes.
Directional Arrows and Their Meanings

- **Straight Ahead**: Up
- **Right**: Right arrow
- **Up on Right**: Y with arrow pointing right
- **Ahead on Left**: Y with arrow pointing left
- **Up on Left**: Y with arrow pointing left
- **Down on Left**: Y with arrow pointing left
- **Up on Right**: Y with arrow pointing right
- **Down**: Down arrow
- **Up**: Up arrow
Arrow Usage

🔥 Lounge

Line of View

❌ Line of View

✅ Line of View
Pathway

Line of View

✘ Lounge

✔ Line of View

✘ Lounge
An arrow pointing down indicates ‘straight ahead’ when it is located near stairway/ramp/escalator that indicates a downward vertical path.
The arrow should always precede the icon followed by the primary text.
This order also applies in vertical arrangements of these elements.
In certain circumstances, an arrow pointing down indicates ‘straight ahead’ when it is located near an upwards vertical path nearby for example a stairway, ramp or escalator.
Pathway

An arrow pointing up indicates ‘straight ahead’.
Space Considerations

All overhead signs are required to have a standard clearance of 2800mm. These signs if grouped together should be organised by size.
Installation examples

Signs placed next to each other should be similar in height and width where possible.
Free standing or floor mounted signs should not serve as obstacles to movement but should also be placed 300mm from the wall.
Installation examples

When multiple signs are required to properly define a path a minimum space of 300mm should be accommodated to ensure clarity of view.

Note: Multiple signs should not be placed too close to each other and stacks of more than 2 signs are less preferred.
Specification overview

This section contains design and fabrication details for the family of sign types developed for the new airport signage standards program.

For each major area - Roadway, Parking and Terminals - there is a sign family overview showing all of the sign types for that area, followed by pages showing each individual sign type in detail. Each sign type page includes a brief description of the sign’s intended use, location, material, and mounting.

SPECIAL NOTES: The text and graphics shown on the drawings for individual sign types on the following pages are included for illustration only. Actual text, graphics and layouts for all sign types and locations will be determined as part of each sign implementation package. All structural and mounting details are shown for reference. The Sign Contractor shall have final responsibility for all structural details and shall provide structural drawings stamped by a licensed Structural Engineer for each signage implementation project.

**Deeply Refrigerated / Compressed Gas**

**Corrosives**
Such as mercury, acids, alkalis, thermometers and barometers containing mercury and wet cell batteries.

**Deeply Refrigerated / Compressed Gas**
Such as butane, oxygen, propane and aqualung cylinders.

**Explosives**
Substances and devices capable, or appearing capable, of being used to cause serious injury or to pose a threat to the safety of aircraft.

**Infectious Substances**
Such as viruses and bacteria.

**Radioactive Materials**
Such as instruments containing radioactive source radioisotopes for research.

**Matches / Lighters**
Only one small packet of safety matches or cigarette lighter that does not contain unabsorbed liquid fuel being carried on the person is permitted.

**Magnetic Materials**

**Flammable Liquid and Solids**
Such as lighter or heater fluids, paints, thinner, solvents, petrol and all matches are unacceptable in baggage.

**Poisons**
Such as arsenic, cyanide, weed killer and tear gas.

**Infectious Substances**

**Radioactive Materials**

**Flammable / Non-Flammable Gas**
Such as aerosols including aerosol paints, filled-aqualung cylinders, carbon dioxide cylinders for soda syphons, gas or fuel cylinders.

*Explosive and Incendiary substances and devices such as ammunition, blasting caps, detonators and fuses, replica or imitation explosive devices, mines, grenades and other explosive military stores, fireworks and pyrotechnics, smoke-generating canisters and smoke-generating cartridges, dynamite, gunpowder and plastic explosives.*
